WORK EXPERIENCE

Frontend JS Developer, Digitz Digitas, Lahore

July 2022- Present

- Hands-on experience with MERN Stack using MVC pattern in Case Study projects.
- Developed and Launched Events like Talks@engro - #TheNext75, #EmbracingEquity for Engro Corp.
- Developed ReactJS codebases that are both dependable and effortless to manage.
- Practical knowledge of using GSAP, BarbaJS, and Framer Motion to incorporate contemporary animations.
- Familiarity with various CMS such as WordPress, Magento, Drupal, Expression Engine, and Shopify.
- Worked directly with clients and stakeholders to develop technical solutions for business cases.
- Revamped web applications security to minimize the chances of attacks & hacking.
- Developed user-friendly websites, including Toyota Pakistan and Engro Corporation, with optimized content and media for swift page loading and seamless accessibility.
- Provided training to several junior employees on internal web operations.
- Consistent usage of code versioning tools like Github and Bitbucket.

Web Manager, Digitz Digitas, Lahore

Oct 2020 - July 2022

- Full responsibility for maintaining and developing L'Oreal and Maybelline websites, utilizing a custom SiteCore backend.
- Developed and maintained the Techvista Systems web application and oversaw its deployment to production.
- Automated multiple sections of the websites for easy & direct management of the content.
- Diagnosed haywire apps to fully functional apps & revamped their code structure.
- Mobile first approach on all websites, which increased traffic by 30%.
- Worked closely with members of the product team to achieve our goals.
- Connected with other stake holders on time efficiency & prioritized tasks as per deadlines.

Associate Web Developer, Symmetry Group, Karachi

April 2019 - Sept 2020

- Wrote concise code for all marketing campaign newsletters, focusing on clarity and simplicity.
- Utilized Adobe Photoshop for the production of web-optimized Images.
- Ensuring timely delivery of the assigned projects by clear understanding of the brand standards.
- Collaborated with my team members to identify project scope and program pipeline issues.
- Shared ideas for 3 new programs, products, and features by monitoring industry developments and trend.
- Kickstarted new projects by creating wireframes, which served as a foundation for creating design mockups and developing them on a test environment.
